Cinturato P6 Cinturato P4

Cinturato is the new Pirelli tyre, with focus on road safety, environment and value for money. Cinturato shows, with 3 different ecoimpact icons on the sidewall of the tyre, its environmental compatibility.

- 1) ENERGY™ EFFICIENT: the low rolling resistance allows lower fuel consumption and, as a consequence, lower Co2 emission, and of course, money saving for the consumer.
- 2) CLEAN AIR: the new tread pattern with high aromatic oil free compounds avoids the loss of substances potentially toxic for the environment.
- 3) HIGH MILEAGE: the high mileage allows lower tyres production with benefits for the environment coming from lower raw material consumption and benefits for consumer expenses.

Without forgetting the high level of safety, specially on wet, and the usual driving pleasure, always two main Pirelli characteristics.

Cinturato is available in 2 different tread pattern.

Cinturato P4:

- Asymmetric tread design for enhanced grip on curve and high cornering force in all weather conditions.
- Larger tread blocks on the outer portion for increased stability during cornering and smaller inner blocks to dissipate water.
- Continuous longitudinal rib provides uniform and constant rubber-to-asphalt contact even at high speed enhancing driving stability.

Cinturato P6:

- Symmetric tread design
- Wide central grooves ensure excellent water expulsion
- Cap and base compound ideal to reduce energy consumption
- Continuous longitudinal rib provides uniform and constant rubber-to-asphalt contact even at high speed providing driving stability
