

# P 7

Balanced Performance

High Performance

Ultra High Performance

Designed predominantly for latest generation cars of medium to high power, P7 represents a contribution to performance in the wet, precise cornering, safety during braking and, above all, lifelong ability to maintain these characteristics.

The tyre achieves safety and driving performance resulting in a tyre effective in the wet, assured in braking, cornering, steering response and also comfortable on long motorway journeys.

### Tread pattern

P7's attractive asymmetric design blends style with an aggressive look. Its design is created to maximize the handling on any ground conditions, in traction, braking and lateral grip, even on most extreme turns.
