

PZero Nero

Balanced Performance

High Performance

Ultra High Performance

Drivers' needs and expectations are becoming more sophisticated, especially at the top end of the car market. Increasingly, fast trackers, the primary target for Pirelli, require ultra-low profile tyres with larger diameter wheels as well as higher tyre load capacity.

PZero Nero's slogan is "works harder, plays harder", derived from the tyre's two major characteristics:

Driving Force

The Extra Load capacity assists in maintaining the performance of both sports saloons with full equipment options and increasingly heavy and powerful tuned cars. New technology ensures a higher load carrying capacity without compromising driving comfort

Driving Enjoyment

The comprehensive range extends the limits of driving pleasure. No compromise in dry and wet handling and, in powerful ABS braking, with significantly reduced stopping distances. These features not only make the PZero Nero the ideal choice for tyre/wheel conversions but add a new dimension to the car that reflects the drivers individuality.

Tread pattern:

Asymmetric Ultra High Performance tread design with variable angle grooves to minimize aquaplaning and optimized pitch for acoustic comfort

Self supporting Run Flat version soon available
