High Performance

Ultra High Performance

PZero Corsa System is an extreme road use tire developed for powerful supercars and enthusiasts who often take their car on the race track, allowing them to maximise their cars performance. The features in tread pattern design, compound and structure, allows PZero Corsa System to satisfy even the most demanding customers in terms of dry handling and braking without compromising on wet handling, noise performance and maximised contact patch with the road surface.

An innovative racing tread compound, ensures maximum grip while the use of ultra-light and flexible belts implies a very wide footprint area.

Original Equipment for the road legal racing cars of the most prestigious car producers (Ferrari, Porsche, Lamborghini, BMW to name only a few)

### Tread pattern

**Asimmetrico:** Asymmetrical design with high land/sea ratio and a large external shoulder structure with a minimum number of grooves.

**Direzionale:** Two longitudinal channels for better response on wet and dry surfaces assuring precise handling
