

## PZero Rosso

Off-Road

On-Road

High Performance

The PZero Rosso has been developed to provide handling and traction for the most powerful last generation SUVs with high performances. Add the sporty look and the last generation compound that Pirelli studied for the PZero Rosso and you will end up with the Top level tire in its segment.

### Tread pattern:

Asymmetric design with wide longitudinal channels. The tread pattern is divided laterally into three distinct elements, each designed to confer a particular aspect of performance. These elements range from robust outer shoulder blocks to provide sharp cornering ability, through a semi-slick central rib with curved transversal grooves for hi speed comfort, to a more open inner shoulder, to avoid aquaplaning and help the water to come out from the pattern

### SIZE RANGE
